Subject: formaldehyde sections

I separated out the allergy-immune sections of the appendix and Ch 1 into two new documents. If we are sending them to someone for review, it would be good to get the HERO tagging done so that it would generate a reference list. I have comment bubbles with all of the tags (I think I have all of them) – can you ask SRC or Vicki Soto or someone to do the tagging?

Did anyone ever send this to McFarland or whoever it was that you were going to send it to?
